STEPHEN MWAURA

Backend Engineer

EDUCATION

Co-operative University of Kenya
Bachelor of Science in Data Science (September 2023 – Present)
ALX SOFTWARE ENGINEERING PROGRAM
Backend Web Development (February 2024 – October 2024)

Complemented a 4-month intensive training in backend development which mainly focused on RESTful APIs, python, Django, and software engineering principles.

MARY MOTHER OF GRACE BOYS SECONDARY SCHOOL
Managed to score a B+ in the Kenya Certificate of Secondary Education.

PROJECTS

Movie API
- Tech Stack: Python, Django
- https://x.com/its_stevemwauraImplemented features like user authentication, token authentication and crud operations for movies.
- The Github link to my project

Social Media API
- Tech Stack: Python, Django Rest Framework, SQLite.
- I built an API that allows users to register, create posts, comment on others' post, like posts, and follow/unfollow other users.
- Focused on user interaction simulating social media functionalities.
- The Github link to my project

SKILLS

Languages: Python, HTML, CSS
Frameworks: Django, Django Rest Framework
Tools: Postman,Git, RESTful APIs, SQLite
Other: Web development , API development , User authentication

PROFESSIONAL SUMMARY

I am a passionate backend engineer who loves building cool websites and APIs. I thrive on solving problems , learning new tech , and improving systems to make technology work better for people. Whether its's coding , I enjoy exploring tech trends , watching football , playin soccer , reading novels, connectig with other tech enthusiasts , and playing video games . Let's build something awesome together!
